Dear Sir/ Madam,

Re: Application for the staff software engineering job.

This letter is to express my interest in the software engineer job that you posted on your linkedin. I have extensive experience in software programming and design, and I am sure that my educational background, as well as my professional achievements, will meet your requirements.

Engaging in tasks that require me to work outside my comfort set, has always been my passion, as they challenge me to deliver the best services. Besides, being involved in emerging trends and issues in the profession has enabled me to acquire development strategies besides learning new languages to develop firms.

Your outlined requirements have a close match with my background and skills.

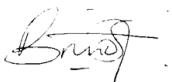

I am a solution-oriented person who thrives in fast-paced and cumbersome environments, where my services and overall performance impacts the bottom line directly. I am confident that my strong educational and professional background, combined with my extensive experience in planning, monitoring and closing various projects, renders me ideally suited for this role.

Please take a look at my copy of my resume to learn more about my educational background and significant professional achievements. You can also reach me through my email address or contacts specified above.

I will gladly follow up with you to speak about my qualifications and achievements, at your own convenient time.

Thank you for your consideration.

Sincerely yours

Bruno Mugire.
